Resume

Front-end developer with over 5 years of experience in creating modern, responsive, accessible, and high-performance interfaces. I have expertise in developing modular architectures, design systems, and reusable components, with a focus on scalability, maintainability, and performance optimization. I apply software engineering best practices, testing, and REST API integration to deliver efficient, high-quality solutions.

Experience

Dadus - Fábrica de Software

Remote, Brazil

Front-end developer

12/2025 - 09/2026

ERP Exclusively for Auto Parts Businesses

Development and maintenance of an internal management platform for the auto parts sector, with a focus on performance, user experience, scalability, and application modernization.

- Development of interfaces using Vue.js and TypeScript, with a focus on front-end architecture and the creation of reusable components.
- Integration with REST APIs for inventory workflows and reporting.
- Collaboration with the team on the development and maintenance of features, with a focus on code quality, UI consistency, and conducting code reviews.

Culte

Remote, Brazil
